## Sprint 1, Week 1 - Wednesday, 23.4.2025 to Tuesday, 29.4.2025

During this week During this week During this week

_	
#	Description of the activity
1	Research how to implement CI/CD on GitLab
	Octor Oil ob Ol/OD Down on
2	Set up GitLab CI/CD Runner
3	Install GitLab Runner (target: Ubuntu VM)

	December of the test of the CVOD
	Research appropriate tech stack for CI/CD +
4	security tools
F	Virtual Machine configuration
5	Virtual Machine configuration
6	Install Docker Engine on VM
	Install bocker Engine on vivi
7	. Create Dockerfiles for containerization
	. Ordate Dockernies for containenzation
o	Soarch Gitligh Sorver Access / Authortication
	Search GitLab Server Access / Authentication
9	

### Sprint 1, Week 2 - Wednesday, 30.4.2025 to Tuesday, 6.5.2025

During this week During this week During this week team members have contributed 100% of the expe team members have contributed >100% of the exp team members have contributed <100% of the exp

#		Description of the activity
	1	Research for Acceptance Criteria
	2	Research for Defination of done
	3	checking the commands and tools required for the CI/CD pipeline of the todolist app
		research on ubuntu VM
	5	Configure properly the gitlab-runner in the VM
		Replace base Images with custom Images for
	6	future security tools implementation
	7	
	8	
	9	

#### Sprint 2, Week 1 - Wednesday, 7.5.2025 to Tuesday, 13.5.2025

During this week During this week During this week

- 3 team members have contributed 100% of the expe team members have contributed >100% of the exp
- 0 team members have contributed <100% of the exp

#	Description of the activity
1	Backlog refinement
2	Acceptance Criteria
3	DoD
	Story: As a Security Champion, I want to fix 3 selected vulnerabilities in the Juice Shop and document the fixes according to secure coding
4	guidelines.

	Story: As a Security Champion, I want to research
	and test if these vulnerabilities can be
	automatically detected using SAST tools like
5	Semgrep.
	Story: As a Security Champion, I want to
	contribute to the Secure Coding Checklist so
	developers can avoid these vulnerabilities in
6	future.
	Story: As a DevOps engineer, I want to learn
	about the chosen container scannning tool for
7	further implementation in our CI/CD pipelines
	Story: As a DevOps engineer, I want to research
	which container scanner tool fits better our use
8	case
	Story: As a DevOps engineer, I want to implement
9	the container scanning tool to our CI/CD pipelines
	Story: As a DevOps, I want to choose the most
	appropiate SAST tool based on the projects
10	needs
	Story: As a DevOps engineer, I want to learn
	about the chosen SAST tool for further
11	implementation in our CI/CD pipelines

# Sprint 2, Week 2 - Wednesday, 14.5.2025 to Tuesday, 20.5.2025

During this week During this week During this week

- 3 team members have contributed 100% of the expe team members have contributed >100% of the exp
- 0 team members have contributed <100% of the exp

#	Description of the activity
1	Research and learn the chosen scanning tool
2	implement the scanning tool
3	research and learn the fuzzing tool
4	implement the fuzzing tool
5	Implement the SAST tool and get report
6	Documentation
7	Weekly Scrum + Project extra planning
	Research dependency scanning and learn how to
8	use Dependency check and generate reports
	Run dependency scan on Todo List app and
9	analyze results
	Format and prepare the data for dashboard
10	integration

## Sprint 3, Week 1 - Wednesday, 21.5.2025 to Tuesday, 27.5.2025

During this week During this week During this week team members have contributed 100% of the expe team members have contributed >100% of the exp team members have contributed <100% of the exp

#	Description of the activity
	completed fuzzing stage in todolist pipeline
	modified Dockerfile to fit the todolist Project actual
	requirements
2	2
	modified todolist Project to add the fuzzing
	function
	3
	researched publishing the container and package
4	for the todolist
	Researched OWASP Dependency-Check and
	evaluated how it fits our use case
	Documented the entire process and created a
(	Word report for submission
_	research, decide and learn the DAST tool for our
	to do app
3	Implement the DAST tool for the to do app
	research, decide and learn the SAST tool for our
	juice shop
	implement the SAST tool for juice shop
1	implement dependency check for our juice shop
	Research, decide and learn the DAST for our
	2 juice shop
	Implement the DAST tool for the JUICE SHOP
	Team sprint planning and sprint release
13	sprint review and feedback

## Sprint 3, Week 2 - Wednesday, 28.5.2025 to Tuesday, 3.6.2025

During this week During this week During this week

#	Description of the activity
	completed fuzzing in todolist and juice shop
1	pipeline
2	completed container publishing in both pipelines
	documented fully process of fuzzing, container
3	scanning, and container publishing
	added SAST sonerqube and dast-zap to CI/CD
4	pipeline in todoapp
	added gitleaks, added semgrep to CI/CD pipelien
5	juiceshop
6	checked container scanning in todolist pipeline
	<u> </u>
7	modified container scanning in juiceshop pipeline
	added the deployment stage to both juiceshop
	and todoapp made sure its running and deployed
8	on the vm
	modified the dockerfiles to add the correct versión
	of the dependencias neede for both projects to
9	run
10	completed package publishing in todolist pipeline
	Implemented and tested Trivy container scanning
	script on the OWASP Juice Shop Docker image.
	Uploaded and configured custom scanning scripts
	(`dependency-check.sh` and `trivy-scan.sh`) in
11	the GitLab repository.
	Refined the sprint 3 backlog and added
12	acceptance criteria
	Prepared and organized project directories
	(`security-scanners/`) to support CI/CD
13	integration.
	Researched and attempted integration of OWASP
	Dependency-Check for scanning Juice Shop
14	dependencies.
	One and a full invalence of the
4.5	Generated a full implementation guide and
15	documented the scanning process for future use.

respective user	
story- or task-ID	Duration of the activity <sup>(2)</sup>
As a DevOps engineer, I	1.0
As a DevOps	
engineer, I want to	
configure a GitLab	
Runner for our	
projects, so that	
pipelines can	
automatically execute	
build and deploy	, -
jobs.	1.5
A a a ayatam	
As a system administrator, I want	
· ·	
to install and register GitLab Runner on	
our Ubuntu VM, so	
that jobs can be run	
in a controlled, self-	
hosted environment.	0.5

As a solution architect, I want to evaluate and choose the right tools (CI/CD, scanners, container engine), so that our pipeline is compatible, scalable, and secure.  As a system admin, I want to configure a VM with required	0.5
packages and networking, so that it can host Docker containers and GitLab Runner securely.	1.0
As a DevOps engineer, I want to install Docker on our VM, so that I can use containers to deploy apps and run security scans in isolated environments.	0.5
As a developer, I want to write Dockerfiles for the Todo App and Juice Shop, so that they can be built and deployed in consistent container environments.	0.5
As a DevOps engineer, I want to verify and set up access to the GitLab server, so that our runner can securely connect and pull repositories to execute CI/CD jobs.	1.0
